

MESOSHR

Excess Hair Solution

Age-preserving hair growth inhibitor

DERMEDICS™ MESO SHR is a serum designed for safe and effective reduction of unwanted hair with state of the art anti-aging and skin protecting properties. Ideal solution in skincare after shaving, depilation and photo-epilation. Recommended for women and men of all ages.

SHR = acronym from: **S**trong **H**air **R**eduction.

Overview

- Daily skin care of face and body
- Unisex: for women and men, for skin of all types
- Ideal for women with hirsutism problems
(Hirsutism is the excessive hairiness on women in those parts of the body where terminal hair does not normally occur or is minimal - for example, a beard or chest hair).
- Ideal for women 50+
(during menopause the hair starts to grow on face in women)
- Post-shaving care for women and men
(serum delays hair growth which extends the breaks between next shaving)
- Ideal skin care product after ladies-mustache removal
- Post-epilation care
IMPORTANT: this serum is the most effective on opened follicles, so its effectiveness will be much better after epilation than after shaving.
- Ideal also for sensitive and fragile skin

Effects

- Inhibits hair growth via a unique technology of dormancy
- Provides stable and safe elimination of excess hair
- Prevents from folliculitis
- Prevents from inflammation post-shaving
- Reduces the risk of cutaneous staining in follicles
- Boasts anti-aging benefits
